

Jose Angel Alvarez Beltran

Cel. (+57) 324 6206033 - jose.albelt1817@gmail.com

Systems Engineer with experience in Development (Angular/React/Node.js.). Passionate about innovation and solution optimization, I use modern technologies to improve efficiency, scalability and performance of projects. I stand out for an analytical and collaborative approach, integrating easily in multidisciplinary teams and providing strategic solutions aligned with business objectives. Committed to continuous improvement, I enjoy facing new challenges and constantly learning to stay at the forefront of technology. In addition, I have a professional card to practice, supporting my training and experience in the field.

EXPERIENCE

Web Developer.

Efficode S.A.S. | Sincelejo Jan 2023 - Jan 2024.

- I contributed to the development of web applications using Angular/React (frontend) and Node.js (backend), following clean code and SOLID principles.
- I participated in the integration of RESTful APIs to connect services and improve the functionality of the projects (supaBase).
- I collaborated with UX/QA teams to adjust visual components and resolve bugs, ensuring an optimal user experience.
- Implemented responsive design using CSS Grid/Flexbox, ensuring compatibility on mobile devices and tablets.
